

TARGET AV-1 Adhesive Vacuum

HELPS ELIMINATE ADHESIVE OVERSPRAY

COMPACT & QUIET

DISPOSABLE FILTERS

LOWERS PRESS MAINTENANCE COSTS

550 CFM Axial Vacuum Fan

REDUCES LABOR

MADE IN USA

The Target AV-1 Adhesive Vacuum helps eliminate damaging adhesive overspray. Located under the load/unload station, the AV-1 quietly vacuums away adhesive overspray and captures it in two inexpensive disposable paper air filters. When the filter is full, simply remove upper filter and dispose of it. The lower filter is then moved up and a new filter slid into the lower slot.

Compact design fits conveniently under press

Dual Filters for Maximum Adhesive Capture

Vacuum is created by a high torque axial fan that moves over 550 CFM (cubic feet per minute) The unit creates a down draft vortex that sucks floating adhesive particles in the filters for easy capture. When used with the Target TB range of adhesive applicators a virtually adhesive free area can be created around the press. Available in 110v 60Hz or 220-230v 50Hz, the AV-1 is the practical solution to adhesive contamination in the print shop.
